

Installation of new private-side water service laterals during 2026 were financed by special Lead Service Replacement Safe Drinking Water State Revolving Funds.

The DWSRF-LSL program is administered by WDNR & EPA with joint funding from the U.S. Environmental Protection Agency and WDNR.

The estimated Safe Drinking Water Fund – LSL Loan amount is \$4,290,000, including up to 75% of loan money in principal forgiveness.

This project involves replacement of up to 350 private water service laterals throughout the City during 2026 and 2027.

DWSRF-LSL programs operate around the country to provide states and communities the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nationwide.
